

SC852 STUMP CUTTER

CUTTER WHEEL. High cutter wheel moves away from the machine as the boom drops, increasing the maximum cutting width. The SC852 gives you a cutting height of 31" (78.7 cm) above ground and 25" (63.5 cm) below — the deepest cut in its class.

COMPACT FOOTPRINT. Front-mounted controls offer maneuverability in confined spaces by allowing the operator to walk in-line with the machine.

CHIP CONTAINMENT. Ground clearance allows plenty of room for chip containment, while the rounded chip blade moves chips around the jobsite easily, reducing the need for manual chip moving. A wide wheel base provides stability; a differential lock on the 4WD system can be disengaged for tight turning.

DIRECT DRIVE. Direct drive hydrostatic pump and gearbox eliminates clutch and belt-drive maintenance. Cutter wheel stopping time is reduced with no-maintenance hydrostatic braking.

MAINTENANCE ACCESSIBILITY. Easy access to daily service points. Other maintenance areas can be reached easily through hinged doors and removable panels.

PATENTED YELLOW JACKET™ CUTTER SYSTEM. The Vermeer-exclusive Yellow Jacket cutter system is designed to provide faster, easier serviceability, as well as extended pocket and tooth life.
